NE-1037 Reliable Medium Duty Microwave

Ideal for small businesses. Defrosts, heats and cooks in no time.

Easy to use, manually operated or programmable, these models are designed to withstand the strong demands of professional use.

Whether chilled ready meals or frozen snacks they all must be heated - these models cover the demands of smaller to medium-sized businesses.

22 Litre Cooking Space

With a 22L cavity it is designed to accommodate a 1/2 Gastronorm container. For speedy cleaning the cavity and casing is made from high performance stainless steel, and the ceiling plate can be easily removed.

Superior Regeneration

In an efficient kitchen where the preparation of the pre-cooked meals can be vital, the Panasonic professional microwave allows you to regenerate food whilst maintaining high quality. The serving temperature is reached quickly with no detriment to the appearance, taste or texture. With no preheating or unnecessary stand by modes required, You benefit from;

- Less time required
- High service speed
- Low costs

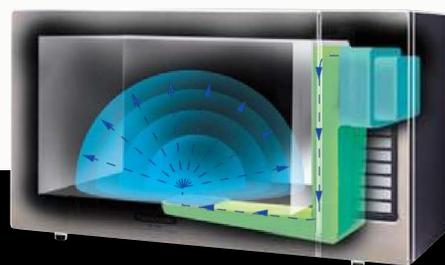

Programmable Memory Button

The program field in a Panasonic Professional microwave can generate quick and reliable results even in the most hectic environments. The memory buttons only need to be programmed once and whether trained or not any member of the kitchen staff can use it.

Easy Thawing

High quality results in the shortest time including freshness and lack of waste.

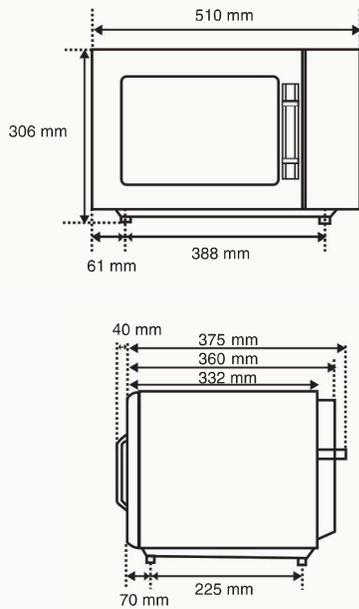

Optimal combination of power and microwave distribution means that that frozen goods are defrosted more efficiently. Thawing times are dramatically reduced and even allows food such as vegetables to retain their appearance, structure and weight.
